Achievement

Victory was just the beginning. I entered over 20+ hackathons, won 9 but the real prize wasn't on stage. It was in the pressure, the partnership, and the person I became with every line of code we dared to write together.

☞ **SIH 2023 – National Level**
Outcome: Grand Finalist
Team: Tech Simp 24 hours of non-stop Experience: brainstorming and debugging that welded our team together through coffee, code, and pure grit.

☞ **UST Global National Hackathon**
Outcome: 4th Place (International Level) Experience: Competing with India's best—intimidating, inspiring, and a validation of our relentless hustle.

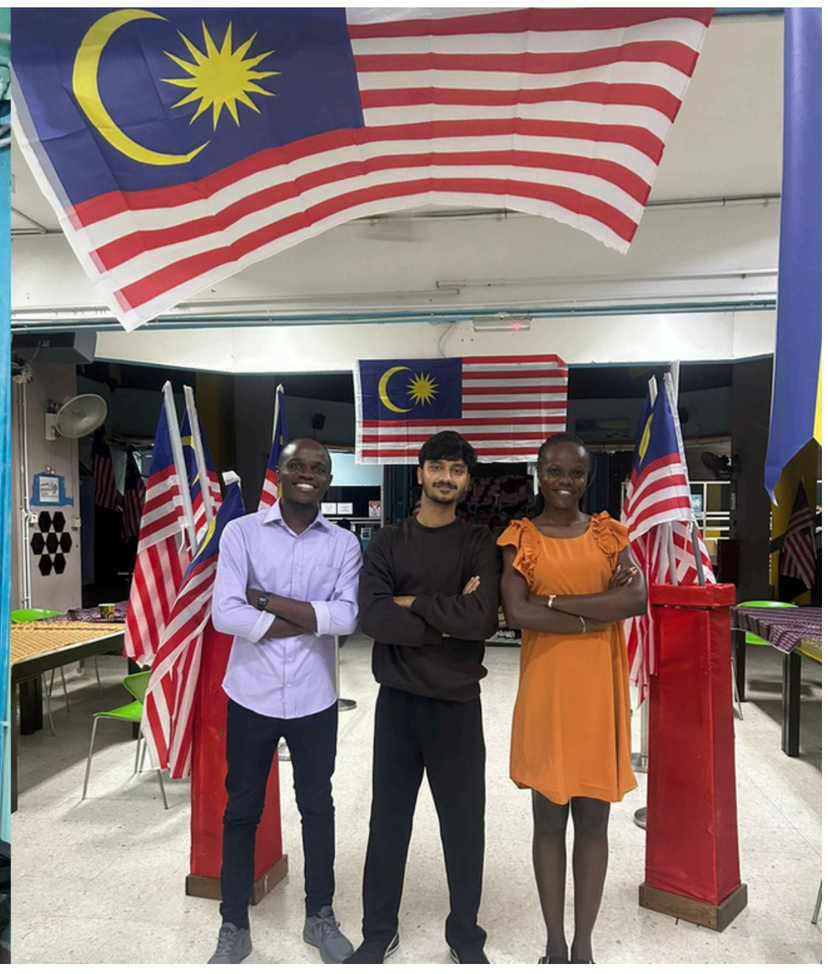

☞ **Purple Jhallosh, PCMP Pune Winner**
Outcome: Governor of Maharashtra)
Experience: Live-testing with users here our code met compassion, and purpose met applause.

☞ **Vishwakarma 2024**
Outcome: Reached Product Dev Phase (Grant: ₹15,000)
Experience: Tackling real police data—our toughest challenge and proudest near-win.

International Hackathon

Sometimes life's biggest opportunities arrive without warning. I was mid-badminton rally when my phone buzzed—a notification. I checked it and froze.

An invitation to the IEEE YESIST12 Grand Finals in Malaysia. Selected from over 10,000 entries—as a solo participant.

I shouted, dropped my racket, and sprinted. And I wasn't going alone—I was international flight together. His smile, wide and proud, said everything words couldn't.

There, I stepped onto a global stage. I met innovators like Rajja from Pakistan, Kennedy from Kenya, and Aditya, Animesh, Sakshitha from India. We weren't just competitors we became collaborators, sharing ideas and laughter across borders.

My dad watched, beaming. We were representing our country.

We didn't win a trophy. But we brought back something greater: memories of a first flight, friendships across the world, and the quiet pride of carrying our nation's name forward. Sometimes the real victory isn't on stage—it's in the story you bring back home.

Important Lessons of Life

Hackathons aren't just about winning.
They're about growing, learning, failing, rising, and discovering stronger versions of ourselves.

With every project, I earn something new.
With every challenge, I gain experience.
With every collaboration, I grow.
With every setback, I understand my passion to innovate even more deeply.

Rise and fall come in every life—but losses aren't signs of weakness.
They are reminders that every ending carries the seed of a new beginning.

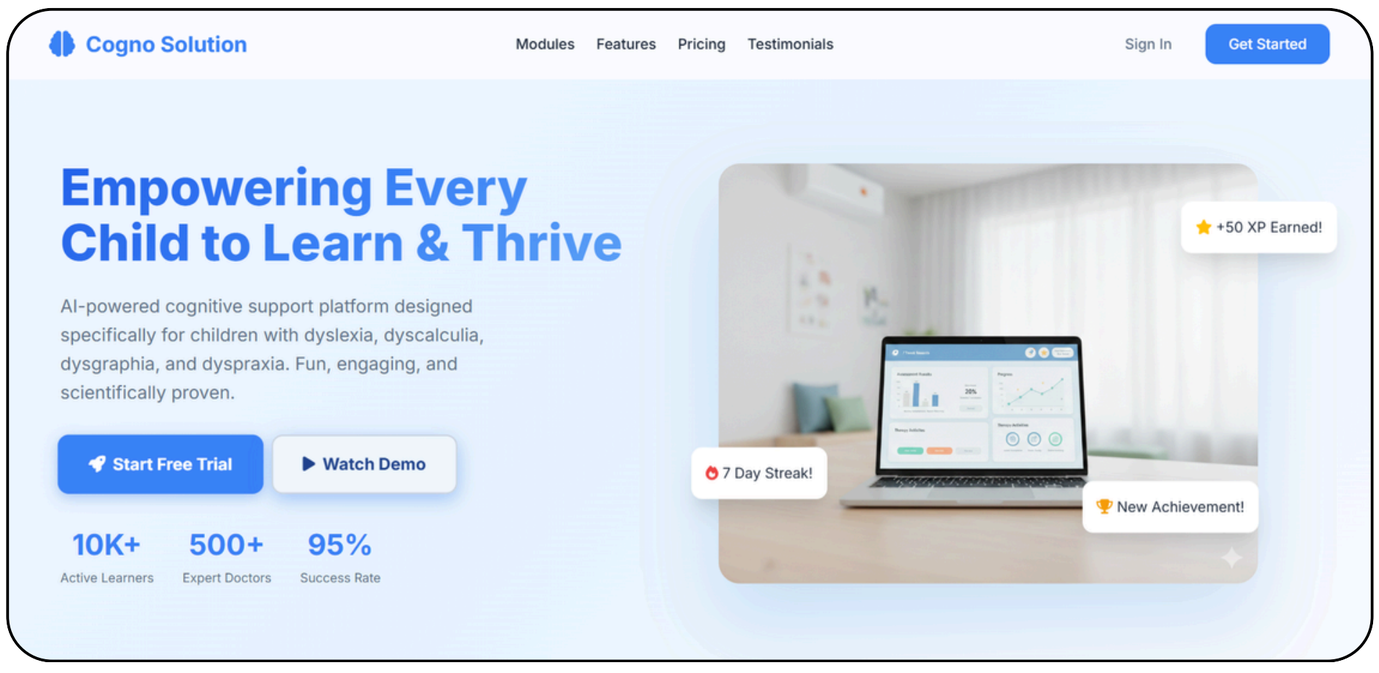

And remember this:
In the future, you might not get an internship or a job immediately.

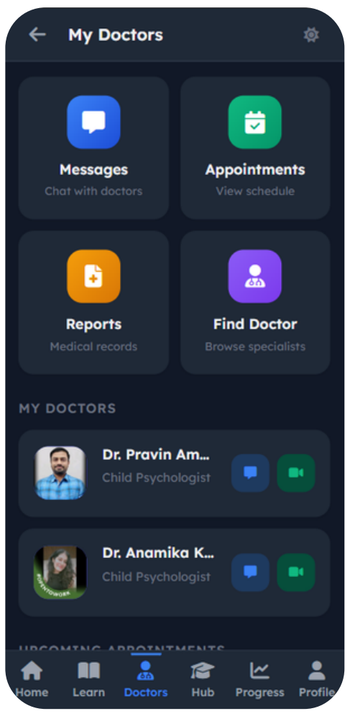

But that never defines your true knowledge, your abilities, or your value.
Every person has a different journey.
Every story unfolds at its own pace.
Your mindset shapes your path.
Your thoughts shape what you attract.

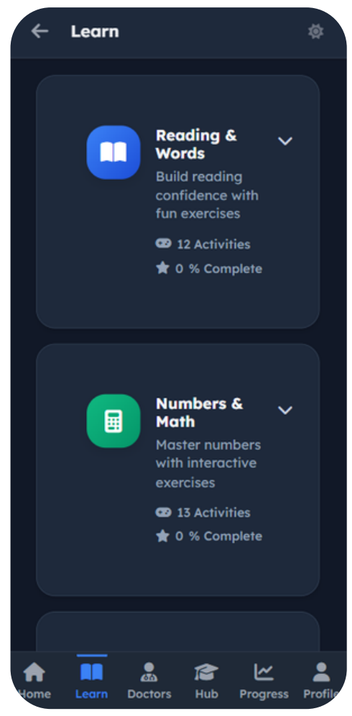

So think positively, work with passion, and trust the process. Because the best things in life arrive when you stay hopeful and never stop learning.

Cogno Solution

Visit : https://cognosolution.vercel.app/

Cogno Solution is a digital cognitive care platform focused on early identification and structured intervention for learning disorders such as dyslexia, dysgraphia, dyscalculia, and dyspraxia. It offers cognitive assessments, personalized learning activities, progress tracking dashboards, and performance analytics. The platform provides services for parents, teachers, and institutions, enabling evidence-based support through interactive modules and continuous monitoring.

The platform emphasizes collaboration with schools, therapists, psychologists, and special educators to validate effectiveness through real-world testing. Cogno Solution ensures transparency, reduces misdiagnosis, and promotes inclusive education. It builds a connected ecosystem where structured improvement plans and continuous monitoring empower children to grow confidently and achieve academic success.

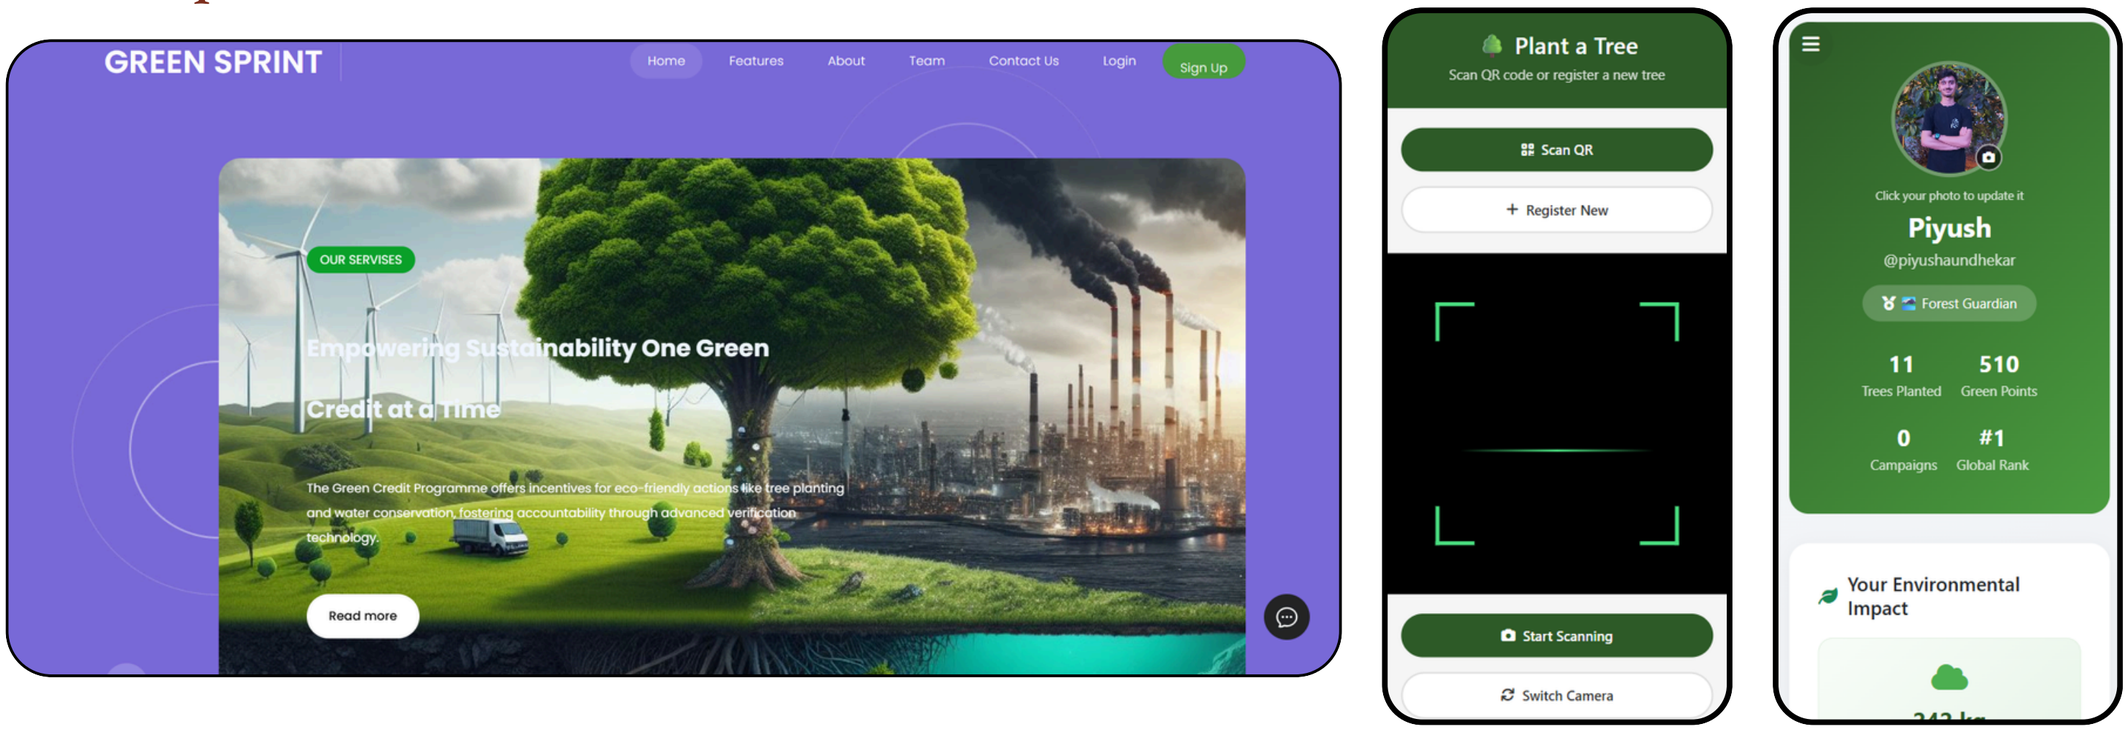

→ **Key Services & Features:**

- Early cognitive screening and assessments
- Personalized learning activities
- Adaptive exercises based on performance
- Parent and teacher support panel
- Real-time progress tracking dashboard

Major Projects

Green Sprint

Visit : https://greensprint.netlify.app/

Green Sprint is a technology-driven sustainability platform designed to ensure transparency and accountability in environmental initiatives like tree plantation and e-waste management. It provides digital tracking, verification mechanisms, and impact visibility to prevent greenwashing. The platform transforms traditional environmental drives into measurable, data-backed, and community-driven sustainability actions.

The platform collaborates with schools, NGOs, communities, and environmental organizations to create a trusted ecosystem for sustainable action. Green Sprint ensures transparency through secure data recording, continuous monitoring, and public impact visibility. It encourages participation using gamification models, building accountability while promoting long-term environmental responsibility.

→ Key Services & Features:

- Tree plantation digital identity system
- Geo-tagged location verification
- Photo evidence validation
- Real-time impact tracking dashboard
- E-waste collection and vendor connection
- Incentive-based reward system (cash/coins)
